CPD Overview

Weaving together timeless Danish design, long-lasting quality, natural comfort and progressive sustainable thinking, Ege Carpets craft wall-to-wall carpets, rugs, carpet tiles and planks for commercial buildings, hotels, cruise ships, art galleries, exhibitions and more.

Featuring ready-made collections, collaborations with world class designers and fully bespoke solutions, we can service any project requirements.

We want to create the world’s most sustainable carpets
At Ege Carpets, we're rewriting the industry standards and rethinking how quality and sustainability – from material to end product – can be combined. Therefore, Ege Carpets is the only carpet manufacturer worldwide with a 100% Cradle to Cradle Bronze Certified® assortment of carpets for commercial use.

Danish heritage, global reach
Ege Carpets are headquartered in Denmark and have subsidiaries in Norway, Sweden, Germany, France, UK, Lithuania, China, United Arab Emirates and the US. We also have a strong network of agents and distributors and sell our products to over 80 countries.

Our heritage is expressed in the design and quality of our carpets and in the values and mindset that form the basis of how we do business with our customers.

Designing beautiful carpets for a sustainable future
We exist to design beautiful carpets for a sustainable future. By continuously rethinking the ways of production and pioneering the art of creative design, we believe in making sustainability a beautiful choice.

It all started in 1938 with the entrepreneurial spirit of our founder, who envisioned and realized novel carpet creations by weaving the traditions of arts into the crafts of industrial quality. From a virtue of persistency, he believed that if you keep at it, and work hard, anything is possible.

While it's our business to create exceptional carpets, it has always been our ethical duty to inspire for the progress of society. By constantly challenging the conventions of production, we impatiently demand more of today to ensure that we create a better tomorrow – one carpet at a time.

At the core of our DNA is a pioneering spirit, a human approach and the willingness to always walk the extra mile. Together, we're guided by our three fundamental virtues:

With a strong Danish heritage and a global reach, we aim to be the trendsetting supplier to the most demanding sectors of the market. By enabling freedom and flexibility in design, every carpet becomes an opportunity to increase life quality and enhance beauty.
