Hinge Specification and Legislation

This presentation examines the differing types of hinge on the market and their limitations. It provides a guide of the requirements a manufacturer must comply with to get legal accreditation for CE marking and fire test evidence and discusses the documents that an architect needs to ensure that the hinge fully complies with the legislation. By the end of the presentation you should have a greater understanding of:

- The differing type of knuckle and when to consider them
- The legal documentation required to protect the architect from future challenge in the event of a fire
- The information required to be sure of a correct hinge specification every time

This CPD can be delivered to you live and remotely.

Material type:	Online Learning, Seminar
RIBA Core Curriculum:	Design, construction and technology Legal, regulatory and statutory compliance
Knowledge level:	General Awareness
