Environmental and Land Constraints in the Design Process

This seminar will highlight the ever-increasing demands on planners and designers and the type of environmental and land constraints that are being looked for throughout the planning process. It will take designers through the work of an environmental auditor and assessor, demonstrate why a phase one and conceptual model are important in the planning process and how it can be incorporated into design work. This CPD will help you to understand the following topics:

- The latest environmental legislation around the planning process
- The type of land constraints planners are looking for
- How phase one and conceptual models are put together
- How you can incorporate managing environmental and land constraints into your designs

Material type: Online Learning

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: Microlearning

Ordnance Survey Mapping and Environmental Data on Desktop

This seminar looks at:

- Sources and applications of digital ordnance survey mapping
- Sources of environmental data including case studies
- Sources of planning data
- Historical mapping
- Aerial photography

Material type: Seminar

RIBA Core Curriculum: **Business, clients and services**
Design, construction and technology

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Special activities, requirements

Office and project management > Drawing office equipment

Office and project management > Practice and project management

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *Microlearning*

Sustainable architecture

Knowledge level: *Microlearning*

Business, clients and services
