CPD Overview

Welcome to the future of waterproofing

We are Proteus Waterproofing - a single source systems provider, delivering the total waterproofing and protection package.

We are unique with the ability to offer innovative products alongside more traditional waterproofing systems, giving specifiers, contractors and building owners a real choice.

We offer solutions from roof design at the outset of the project, with comprehensive technical support throughout, supported by BBA accreditation, with insurance backed guarantees on project completion.

We are a leading supplier of competitive, high-performance waterproofing and insulation systems for new build and refurbishment projects which include hot and cold applied liquid membrane technologies, reinforced bitumen membrane systems, living green and biodiverse roof systems and attenuated blue roof systems.

Our technical department offers architects and designers project specific bespoke warm and inverted insulation designs, incorporating non-combustible and high performance products for a wide range of applications and design requirements.

We cover the UK and Ireland from two separate office and distribution centres in Essex, and offer nationwide installer training at our head office in the South, and at a dedicated training facility in the North of England.

The company was founded in 2010 and since then, has grown to become one of the UK's market leaders with a reputation for providing high-quality systems and excellent customer service, a combination which has contributed to its rapid growth across all parts of the UK.

Proteus Waterproofing offers a wide range of systems for various applications, including inverted and warm deck roofs, terraces, balconies, walkways, car parks, and podiums. Our extensive range of waterproofing products offer unique benefits that make them suitable for specific applications.

Our Mission

Our mission is to provide innovative, value-driven waterproofing solutions that meet the needs of our customers by developing and providing high-quality technically designed products and systems, matched with excellent customer service.

Committed to the Environment

Proteus Waterproofing is a company that is committed to the environment, and this commitment is reflected in our range of products and sustainable practices, which are designed to minimise environmental impact while providing high-performance solutions.

A growing number of our products have Environmental Product Declarations (EPD's), allowing designers to assess the carbon impact of the individual materials being incorporated into each project design.

Sustainable Practices

Proteus Waterproofing's commitment to the environment is not just limited to its green products. It is also extended to sustainable practices, such as reducing waste and recycling.

Proteus uses recycled materials in its products wherever possible and has implemented a number of initiatives to reduce waste, such as recycling paper and cardboard, and reusing packaging materials.

Committed to quality

Proteus Waterproofing is also committed to quality. The company has a rigorous quality control process and testing regime to ensure that its products meet the highest standards of performance and durability. This ensures that Proteus products provide long-lasting, high-performance solutions, reduces the need for repairs and replacements and minimises environmental impact.

Customer and Technical Service

The company has a policy to provide its customers with exceptional standards of service, and this is evident by our customer and technical support.

Our team of experienced professionals is always available to offer technical advice and assistance to ensure our customers receive the best possible back-up at all times – from initial to final installation and beyond.

Proteus – the future

Proteus Waterproofing has ambitious plans for expansion and we remain one of the fastest growing companies of our kind. We continue to explore new markets and are constantly expanding our product range to meet the changing needs of our customers.

Our Accreditations

We have a wide range of recognised accreditations to support our product range.

The vast majority of our systems have been independently tested and certified by the British Board of Agrément (BBA). This certification provides customers with peace of mind that this and the other products in our range, are of the highest quality and have been thoroughly tested.

Innovation, product development and growth

Proteus Waterproofing has invested heavily in innovation and product development and is constantly looking for ways to improve its products and services. To deliver this, the company has invested in one of the most up to date automated warehouse facilities in the country.

The distribution facility represents a significant investment and is expected to provide a range of benefits for the customer, including inflationary supply chain mitigation, increased storage capacity, improved logistics and distribution, and enhanced efficiency.

Introduction to Roof Waterproofing

The CPD presentation "Introduction to Roof Waterproofing" covers a range of essential topics that will appeal to both novice and experienced attendees. The presentation will delve into various roof types, waterproofing membranes, terminology, building regulations (including Approved Document L and Approved Document B), insulation, and British Standards. Whether you're new to the field or a seasoned professional, this session promises to offer new and interesting insights that will enhance your understanding of roof waterproofing.

By the end of this CPD delegates should have:

1. A comprehensive understanding of the topic: Gained a comprehensive understanding of different roof types, waterproofing membranes, terminology, building regulations, insulation, and British Standards as they relate to roof waterproofing.
2. Have applicable knowledge on the topic: Be able to apply the knowledge gained to identify the most suitable waterproofing solutions for different roof types and understand how building regulations and standards impact the waterproofing.
3. Be able to communicate effectively on the subject : Be able to articulate the key terminology and best practices in roof waterproofing, enabling effective communication with stakeholders involved in the construction and maintenance of buildings.
4. Understanding of Compliance and Quality Assurance: Understand the importance of compliance with building regulations, Approved Document L, Approved Document B, and British Standards to ensure high-quality and durable roof waterproofing solutions.
5. Gained knowledge on the integration of insulation and waterproofing: Gained the ability to integrate insulation with waterproofing, considering the impact on energy efficiency and compliance with relevant standards and regulations.
