Warm Water Underfloor Heating CPD Guide For Architects And Specifiers

Our Warm Water Underfloor Heating CPD explains how underfloor heating works, in comparison to radiators.

We run through all of the benefits and key elements including the different type of systems and how to specify the correct system for the project.

We explain how underfloor heating works with renewable energy and which floor finishes are compatible.

By the end of this CPD delegates should:

1. Understand how underfloor heating works.
2. Know the benefits of underfloor heating.
3. Be confident to decide which systems to specify on a project
4. Understand how underfloor heating plays its part in renewable energy.
5. Understand which floor finishes are compatible with underfloor heating.

Material type:

Online Learning, Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Services

Drainage > Underground pipes and fittings

Space heating > Wall, underfloor and ceiling heating

Engineering

Mechanical heating, cooling and refrigeration > Underfloor, ceiling, wall heating

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*
