CPD Overview

Kemper System is the company behind KEMPEROL® liquid resin waterproofing systems - Cold applied, the resins saturate a reinforcement fleece which is extremely tough, and cure to form a seamless, monolithic, elastomeric membrane for the long-term protection of roofs, balconies, terraces, podium decks, critical structures, buildings and much more.

Applied in a single process that saves time and money on-site, the waterproofing systems have a fifty-year track record of proven performance and are certified by the BBA with an expected working life in excess of 25 years.

The product range includes solvent-free and odourless - Kemperol 2K-PUR, 80% of which is derived from renewable resources

Specification of Liquid Roofing and Waterproofing Systems: A Sustainable Approach

This seminar is a succinct 45 minute presentation of the key areas relating to cold liquid-applied waterproofing for flat roofs and other applications. Liquid waterproofing is the fastest growing sector of the roofing market and in many cases now the preferred method for both new build and refurbishment.

The presentation has a particular emphasis on sustainability and covers the specification of sustainable liquid roofing in new build, and refurbishment projects and in warm roof and green roof systems.
