CPD Overview

Manufacturers of Domestic and Commercial Stainless Steel Cylinders. For more than 50 years we've perfected the stainless steel water heater. The ideal combination of premium materials, automated manufacturing and intelligent solutions. We design for minimum heat loss and maximum energy efficiency without compromise. You can be confident specifying OSO.

Unvented Cylinders: Design Problems Solved

This seminar is about the specification and design of a safe, efficient and cost-effective mains fed hot water system. It will help you to understand the following topics:

- What an unvented hot water cylinder is and how it works
- When to specify an unvented cylinder and when it is not suitable
- The most important design features and how to size an unvented cylinder
- The safety considerations and regulations that apply including the Energy Related Products Directive

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Services

Hot and cold water > Water storage

Engineering

Piped supply systems > Hot and cold water supply systems

General engineering services > Tanks and cisterns

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*
