CPD Overview

Dryvit External Wall Insulation (EWI) & finishing systems are a trusted choice for architects, building owners and contractors who want a high performance, insulated cladding solution. EWI is an extremely effective method of insulating buildings - the systems are based on a simple premise; insulation is more cost effective when placed on the exterior of a building.

Dryvit also offers Prefabricated External Wall Insulation (EWI) solutions, which offer fast track installation for use on either new build or refurbishment projects. Additionally, Dryvit's Anti-Crack Render Only Systems are designed to outperform the shrinkage and cracking characteristics of traditional renders. Explore the benefits of a Dryvit system today.

A brand of CPG UK, we pride ourselves on excellence in customer service, technical support, and service delivery. Working in unison with our sister brands, here at Dryvit we can offer an array of construction products for all stages of your projects.

Tremco CPG UK are committed to shaping the future through innovative approaches and sustainable solutions. Providing the solutions to engineer structures that are more efficient to build and maintain, are virtually impervious to the elements, can provide a multitude of desired finishes.

With an experienced technical and sales team, we are positioned to aid with specification, application-specific product development, problem solving and assistance on-site. So, when it comes to protecting the entire building envelope, CPG UK is the best choice for single-source products, services, and solutions.

External Wall Insulation Systems

This CPD aims to discuss External Wall Insulation (EWI). It covers what external wall insulation is, the benefits, the key performance considerations when specifying EWI, and the architectural freedom and design benefits that these systems can offer. By the end of the presentation you should have a greater understanding of:

- Key performance considerations when specifying EWI
- The design benefits of using EWI systems
- Application information and technical details for the EWI systems
- How to access expert technical support for calculating Wind Loadings, U-Values, Thermal Benefits and Condensation risks
- System and product warranties
- Durability and Maintenance.

This CPD can be delivered to you live and remotely.
