### Guide to the Specification and Application of Screeds

This document provides guidance on the correct design and selection of screed flooring. It will help you to understand the following topics:

- The choice of screed type, including cementitious screeds, calcium sulphate screeds, polymer modified screeds and granolithic screeds
- Screed design considerations and the information needs of specifiers and contractors
- Substrate preparation and methodology
- The application of screed flooring
- Inspection and testing methods available to comply with the relevant British Standards

Material type: Literature

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

### Guide to the Selection of Deck Waterproofing and Wearing Surfaces for Car Parks

The aim of the guide is to assist car park owners, construction consultants and architects to select the most appropriate and cost effective deck waterproofing and wearing surface for both new build and refurbished car parks. This process includes:

- Condition of the structure and the decks
- The existence of any previous surfacing treatments and their condition
- The anticipated future level of use and exposure
- The sustainability of the products and system components used
- System performance, thickness and build up
- Bridging capability
- Skid resistance
- Process checklist

Material type: Literature

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

### Guide to the Specification and Application of Synthetic Resin Flooring

The architect will learn about the background to synthetic resin flooring systems, the classification for the different types available, their areas of use, the design criteria, method of application, inspection and maintenance. This guide will help the architect to select the correct use of resin flooring to ensure a 'fit for purpose' system is installed.
