## CPD Overview

---

Falco is the UK's leading manufacturer and installer of high quality cycle hubs, cycle shelters, cycle racks, cycle lockers and advanced cycle products.

Falco has been working closely with architects and specifiers for over 25 years providing creative design solutions to compliment architectural schemes across the UK.

### Creating the Cycle Parking Infrastructure to Support Cycling in the UK

The CPD aims to give the architect a full overview of the issues involved in designing and specifying cycle parking. Cycling is a booming activity and increasingly is being incorporated into planning requirements, as well as other specifications such as BREEAM. The presentation takes a hierarchical look at the planning system and current requirements. It looks at the resources available to architects, describes the different types of cycle parking solutions available and discusses the pros and cons of each cycle facility. This CPD will help you to understand the following topics:

- Cycle parking facilities
- The development of cycling and the growth of cycling as a mainstream form of transportation
- Planning requirements and guidelines
- The design and specification implications of cycle parking, product styles and design solutions
- Other issues for the designer to consider

This CPD can be delivered to you live and remotely.

Material type:	Online Learning, Seminar
RIBA Core Curriculum:	<b>Design, construction and technology</b> <b>Places, planning and communities</b>
Knowledge level:	General Awareness
