## CPD Overview

---

The wedi Group is a leading manufacturer of an inert, dimensionally stable, lightweight, thermally insulating board that is waterproof to its core and is resistant to mould and mildew making it ideal for use in bathrooms, showers, wet rooms, steam rooms, spa and wellness industry. wedi manufactures a product system designed to provide peace of mind for specifiers and installers when tiling in ever critical wet environments.

With BBA Certification and testing to full EN standards, wedi offers a full technical support service and UK-wide delivery. Thanks to the special, high-density Styrofoam® core, wedi products are eco-friendly with zero Ozone Depletion Potential and a Global Warming Potential of 1.

Products include tile backing boards, pre-formed shower elements and kits, vapour boars for use in areas of high humidity, sealing and decoupling mats, sound reduction acoustic boards and steam cabins with or without technology.

wedi also offers a full bespoke service and can deliver high-quality custom-designed steam and thermal rooms with the ability to create actual spa and hydro pools complete with benches as required.

## Available CPD Material (2)

---

Multiple formats

### Building Board Solutions: The ultimate 100% waterproof, modular tile backer solution for wet areas

This CPD covers the key design considerations for wet and damp environments. It also provides a thorough comparison of suitable tiling substrates and looks in-depth at the properties and applications of building board and XPS design solutions. The CPD also covers in detail, the installation and fixing processes and any issues to overcome. By the end of the presentation you should have a greater understanding of:

- The properties and the design potential of XPS building boards
- The key benefits of XPS over other tiling substrates
- The key installation requirements for common applications
- Specifying XPS building boards for a wet or damp environment

This CPD can be delivered to you live and remotely

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

---

### Wet Room Solution

This seminar will help you:

- understand the features and benefits of a wet room system using extruded polystyrene (XPS) versus traditional construction materials
- understand the variety of designs, functions and sizes for both commercial and domestic applications
- understand the components that if used collectively achieve a CE approval for a 'seals for floors and walls in wetrooms'
- understand how to achieve accessibility for wheelchair users
- understand certifications on both fundo trays & boards with benefit to architects
- understand how to select the correct system dependent on the substrate

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**  
**Inclusive environments**

Knowledge level: General Awareness
