CPD Overview

A Swedish manufacturer of high performance finishes and maintenance products for commercial and domestic wood flooring, including lacquers, oils and hard wax oils plus specialist wood floor adhesives.

The range of silane based adhesives includes new Bona Titan, offering supreme performance through Titanium technology and designed to secure very wide or oversized solid wood boards to any type of subfloor. Bona also supplies finishes and associated products for wooden sports floors, abrasives, sanding machines and a dust-free sanding system. All Bona's formulations are certified as low emission products and are designed to have minimal impact on the environment and to be clean and safe for operatives to use.

Specialist installers: Bona offers high quality training to wood floor specialists through its Bona Certified Contractor scheme and can provide a list of trained contractors to specifiers. Bona is also a RIBA approved CPD provider and offers seminars on the specification of finishes for wood floors and how to successfully use adhesives to install wood floors.

Advice on specification to meet performance and aesthetic requirements is available from Bona's Technical department and a team of experienced technical field representatives.

Available CPD Material (2)

Wooden Floors: Specification of Finishes and Maintenance Products

This seminar will:

- Describe the performance and aesthetic properties of the different types of finish now available for wooden floors
- Describe how they should be specified to best meet project requirements
- Look at the importance of correct preparation and application, as well as how to design in preventative maintenance measures, and the specification of ongoing maintenance regimes to extend the time between refinishing

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Timber Floors: Successful Installation Using Adhesives

By providing an increased understanding of the benefits of installing timber floors using adhesive systems, many installations could have a much similar construction. This allows greater flexibility.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
