## CPD Overview

---

For over 160 years Twyford has led the way in bathroom innovation.

Inspired design, fresh thinking and highest production values are at the core of Twyford's ongoing success. The added endorsement of being the world's only bathroom manufacturing company to hold the Royal 'By Appointment' Warrant, held since 1999.

With a reputation for being a 'people' organisation, Twyford has built lasting relationships with its customers whether retailers, distributors, designers, architects, developers and contractors, by providing outstanding service.

Working with some of the finest designers Twyford continually seeks to improve its products aesthetically, but also technically and environmentally. Ground-breaking technological advances include developing the ultra-hygienic Rimfree® toilets and numerous water saving products.

Twyford's technological innovation also extends to SpecMaster specification tool, designed making life easier for architects, designers, specifiers and contractors. Developed in collaboration with NBS (National Building Specification), part of RIBA Enterprises, it's the only online product specification tool to allow specifications to be imported into either NBS Create or NBS Building software.

Since 2015 Twyford has been part of the Geberit Group.
