### Improving Natural Daylight Through a Range of Innovative Roof Window Solutions: A Best Practice Guide to Optimising Natural Light and Energy Efficiency

This seminar is about the effective design and specification of rooflights to result in a thermally efficient roof window that can help reduce energy consumption. It will help you to understand the following topics:

- Thermal performance within roof windows and the risks of not addressing thermal bridging
- Health and safety considerations of roof window specification and installation
- How to comply with Building Regulations Parts L, F and Q
- The aesthetics of roof windows, interior and exterior
- The role of roof windows in energy consumption reduction
- The importance of maximising natural light within design
- Smart automation of roof windows

Material type: Seminar  
RIBA Core Curriculum: [Design, construction and technology](#)  
[Sustainable architecture](#)  
Knowledge level: General Awareness
