An Introduction to the Process of Designing Guardrails and Handrails

The aim of this seminar is to educate architects and design professionals on the important design principles concerning balustrades and handrails. This CPD will provide a basic understanding of architectural railing designs, various material options and how to properly specify your balustrades. The focus will be on performance, the importance of structure for fixing, and standards and regulations. It will help you to understand the following topics:

- The basics of architectural railing design considerations
- The various material strengths and options
- Infill options and fixing solutions for balustrades
- Material cost and life cycle analysis
- British Standards, and Building Regulations Approved Documents related to stairs, ramps and balustrades

This CPD can be delivered to you live and remotely.

Material type:	Online Learning, Seminar
RIBA Core Curriculum:	Design, construction and technology
Knowledge level:	General Awareness
