Considerations for the Design and Specification of Car Lifts

Car lifts are complex, they can allow for increased parking space and it is important to specify them correctly. This course covers health and safety, regulatory compliance, use of energy, fire safety, product application and more. With this information you will be able to confidently design the most efficient car lift possible, either for a new or existing building.

Material type:

Online Learning, Seminar

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Engineering

Transport > Lift, transport systems

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*
