OpenBIM Awareness

The use of OpenBIM is influencing the way the construction industry works, given how the Digital Construction processes are now playing unexpendable roles in projects more than before. Understanding this process and knowing how to collaborate via open and transparent processes is critical for the future of architects and practices alike. This presentation will touch upon the concepts of this paradigm shift, so by the end of this CPD, you should have a greater understanding of what Open BIM is and why it is important, OpenBIM vs Closed BIM, how collaboration works and how you would be able to put that to practice.

Material type:

Online Learning

RIBA Core Curriculum:

Design, construction and technology

Knowledge level:

Microlearning

Classifications

Subject/Product Areas (CI/SfB)

Special activities, requirements

Office and project management > Advisory organisations
