CPD Overview

ThermoSphere is the leading UK manufacturer and supplier of electric underfloor heating solutions.

We make heating simple and have organised our solutions for easy selection based on floor type. Our aim is to give you the control to create an atmosphere that transforms your house in to a home; because comfort is the last thing you should have to think about and the first thing you should feel.

Use ThermoSphere efficient heating solutions paired with our intelligent thermostats to create a personalised heating system that suits you and your environment – reducing energy wastage and saving you money.

Sustainable Bathroom Heating

Trends in bathroom design continue to evolve but how do you make the bathroom feel as good as it looks? This seminar focusses on the importance of sustainable heating design and how it impacts the overall bathroom experience. Energy and efficiency will also be discussed as well as specific builds that not only reduce time and cost of installation but how the same material solves wider heating challenges of the wider project. This CPD will help you to understand the following topics:

- Understand how to make a bathroom feel as good as it looks
- Understand sustainability within the bathroom
- Understand effective bathroom waterproofing
- Understand heating and acoustics
- Understand how to reduce time and cost in the installation process
- Understand how radiant heat has solved bigger problems

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Services

Space heating > Wall, underfloor and ceiling heating

Space heating > Boilers

Space heating > Heat pumps

Controls for services, energy recovery > Energy recovery devices

Fittings

Sanitary and bathroom fittings > Bathroom accessories

Special activities, requirements

Green applications, resources; sustainability > Renewable energy systems

Engineering

Mechanical heating, cooling and refrigeration > Heat pumps

Mechanical heating, cooling and refrigeration > Underfloor, ceiling, wall heating

Ventilation and air conditioning > Heat recovery systems

General engineering services > Central controls, building management systems

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*
