CPD Overview

Havwoods is a wood flooring and cladding business built on trust. Ever since its beginnings in 1975, the company has worked hard to win the confidence of its customers: by consistently providing them with the best quality timber flooring and cladding products and the highest standard of service. Over the years it has grown and developed, brought out innovative timber products and attracted more customers. Today Havwoods is in a better position than ever; the company is now one of the largest UK importers and wholesale distributors of quality hardwood flooring and cladding.

Havwoods holds substantial stocks; its extensive resources are only matched by a product range which can encompass every style and suit every taste, and is suitable for applications from residential to high traffic commercial areas. The company's products are felled within the National and Federal laws of each country of origin.

FSC and PEFC certified wood flooring and cladding products are also available. Although the range is exceptionally wide and varied, there is one thing you can always count on – Havwoods quality.

Available CPD Material (2)

An Introduction to Regenerative Architecture

The focus of this CPD is to introduce the audience to Regenerative Architecture. First Regenerative Design is explored as a whole, framed as an evolution of Sustainable Design, with reference to systems thinking and the circular economy. An exploration of Regenerative Architecture follows, supported by a selection of case studies and references to biomimicry, in terms of material, structural and energy efficiency, and carbon storage. By the end of the seminar you should have a greater understanding of:

- How 'sustainable architecture' is evolving
- What is meant by 'regenerative design'
- The components of 'regenerative architecture'
- The future of sustainable architecture which can be applied to future projects
- Different aspects of biomimicry in the context of architecture

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

Wood and Wellbeing

This CPD looks at what is meant by wellbeing, including its origins, and why it is important, both on a personal level and on a broader economic level and impact on business performance. It aims to boost awareness of global climate change, develop understanding of biophilia and biophilic design and increase awareness of the WELL Building Standard. This CPD will help you to understand the following topics:

- What wellbeing is and why it matters
- What healthy buildings and healthy materials are
- The connection between wood and wellbeing
- The mental and physical health benefits of wood
- The future of wood and wellbeing

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Health, safety and wellbeing

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Finishes

Wall finishes: external > Wall cladding panels

Floor finishes: wood systems > Wood block and strip flooring

Floor finishes: wood systems > Engineered wood finished flooring

External works

Minor buildings: garages etc. > Glasshouses, garden buildings etc.
