## CPD Overview

---

They provide architects, designers and construction companies with advanced industry knowledge, providing solutions to transfer light to the heart of buildings. Applying glass to interiors which excite, perform and enhance wellbeing. Their well developed links with the worlds leading glass manufacturers, their signature supplier Deko of Denmark, BSI, RIBA, Consultant Engineers and the highest level of construction industry accreditations creates a knowledge base which empowers designers to push the boundaries of creativity, performance and sustainability with the application of internal glass and provides their construction partners with a trusted, approved supplier and subcontract specialist. Their trusted, global network ensures we offer an unparalleled service provision to designers, contractors and property owners for whom we bring an ongoing maintenance service for all internal glass products and sliding folding screens.

### Daylight Transfer - A Guide to the Design, Application and Maintenance of Internal Glass

This CPD takes a brief look at the science and benefits to be gained from daylight transfer, taking a snapshot review of the development of glass products and glass systems for interior applications. By the end of the seminar you should have a greater understanding of:

- The impact natural daylight contact can have on human performance
- The difference between glass products and certified glass systems
- How to design, install and maintain Glass Screen Systems with confidence and within compliance
- Relevant Building standards applicable to internal glass applications

Material type:	Seminar
RIBA Core Curriculum:	<b>Design, construction and technology</b> <b>Legal, regulatory and statutory compliance</b>
Knowledge level:	General Awareness
