Guldmann™

CPD Overview

Guldmann has perfected a comprehensive, modular range of patient hoist solutions, drawing on more than a quarter of a century of experience supplying assistive technology products designed to help people live their lives to the full. The company's prime objective is to make sure that carers get more time to provide an all-important personal care. Patient hoists help achieve this by enabling them to make all lifting and moving operations as streamlined and efficient as possible at every single stage. Patient hoists can also be used for other manual handling tasks such as early mobilisation, rehabilitation, physio, and hygiene tasks meeting the exact needs of all concerned.

Rails can be mounted on ceilings, walls or supporting pillars, with unsupported spans of up to 8 metres. Interconnecting elements make it easy to configure rail set-ups for virtually any building, space or requirements.

The discreet, modern design can be made to blend into any style of architecture, interior or décor – either in new structures or as a retrofit.

Available CPD Material (2)

Platform Lifts: Dignified Access Through Bespoke Solutions

This CPD looks at the specification of platform lifts. It will help you to understand the following topics:

- Understand the different types of platform lifts available
- Understand how to specify an appropriate lift for different applications
- Understand the locations where you can install a platform lift
- Understand recommended dimensions, pit depths and travel distances
- Understand installation issues

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Inclusive environments

Knowledge level: General Awareness

Time to Change: Forward Thinking with Ceiling Hoists

This seminar looks at considerations around ceiling hoists and safe patient handling. It will help you to understand the following topics:

- Understand issues around safer working environments and patient safety in a clinical environment
- Understand new legislation regarding overhead ceiling tracked hoists
- Understand different solutions for ceiling hoists and factors affecting rail and hoist installation, including forward planning, project considerations and return on investment

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
