CPD Overview

VitrA Tiles, Turkey's leading exporter of ceramic tiles to the EU, began production in Tuzla, Istanbul, in 1991, Bozüyük, Bilecik, in 1992, and Russia in 2011. VitrA Tiles has an annual capacity of 30 million square meters and sells its products in 75 countries around the world, with Turkey and Germany being its top two markets.

VitrA Tiles brings the 60-year expertise of the VitrA brand to bathrooms and other living spaces, including indoor and outdoor pools, gardens, and building exteriors. Continually developing innovative solutions for textures and materials, VitrA Tiles' new collections are trend setters in the field of tile surfaces. VitrA Tiles were the first Turkish tiles to receive the European Union's eco-label; they also have the Turkish Standards Institute's Double Star certification.

Available CPD Material (5)

Multiple formats

Commercial Washrooms - Hygiene in the Commercial Washroom Environment

This CPD will provide an overview of the hygiene issues associated with the commercial bathroom environment, looking at sector specific scenarios, for example the hotel environment. By the end of the presentation and case studies, you should have a greater understanding of:

- How product choice can help to reduce or break the chain of infection
- How new innovative ideas can reduce or break the chain of infection
- Environmental sustainability issues
- Hygiene issues associated with the commercial bathroom environment

This CPD can be delivered to you live and remotely.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Multiple formats

Bathroom Specifications: Ceramic Sanitaryware

The purpose of this CPD seminar is to help the professionals involved in designing and specifying bathrooms on important areas of consideration. It will help you to understand following topics:

- The material and production process for ceramic sanitaryware
- The relevant industry standards and regulations
- Innovations and modern technologies which can assist with meeting clients' requirements
- Environmental sustainability and improving the sustainable rating of a building project

This CPD can be delivered to you live and remotely

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Swimming Pools with a Tile Finish

The purpose of this CPD is to help the professionals involved in designing and specifying swimming pools to enhance their understanding on important areas. It will help you to understand the following topics

- General design considerations for swimming pools
- Pool construction considerations
- Tile considerations and the selection of tiles to meet various performance criteria
- Industry standards and references

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Understanding, Specifying and Designing with Tiles

To examine the requirements necessary to correctly and appropriately specify ceramic tiling for projects in the hospitality sector including the relevance of using tiles within the sector, an introduction to tiles in general and the design choices available to specifiers. Specific applications will be considered and particular attention paid to slip resistance and how it is specified.
