## CPD Overview

---

COMPAC, The Surfaces Company, is the leading company in Spain marketing high quality decorative surfaces. Founded in 1975, it was the first Spanish company specialising in the manufacture and distribution of marble and quartz surface coverings. Today it is a large multinational with 100% Spanish capital that has learned how to grow while preserving its flexibility and independent decision-making spirit.

COMPAC has two modern production centres for Technological Marble (Spain) and Technological Quartz (Portugal) with a combined capacity of over 4.5 million square meters of products per year. A large-scale company with over 300 professionals, whose common aim is to improve COMPAC products every day and offer a better and more complete service to customers.

COMPAC, faithful to its origins as a family business, is now a large-scale international company with its own warehouses in Spain, Portugal, Belgium, the UK and the US, and a sales network of over 250 dealers who sell these products on every corner of the earth. A company that works tirelessly for all its customers.

## Available CPD Material (1)

---

### Rethinking the Way of Design: Technological Marble and Quartz as a Passionate Creative Process

This CPD looks at the possibilities for creative architectural design provided by the availability of technological marble and quartz. It covers the use of this material for all kinds of applications indoors and outdoors, for facades, floor coverings, wall coverings, and kitchen and bathroom surfaces and countertops. It will help you to understand the following topics:

- Understand the manufacture of technological marble and quartz and the processes capable of empowering new architectural solutions
- Understand the durability, technical features and the environmental efficiency of marble and quartz
- Understand the versatility of design, texture, formats and thicknesses available and how to choose the right material for the right application
- Understand architectural applications and the balance between aesthetics and functionality

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
