CPD Overview

The Italian leader in the production of systems for windows and doors made of galvanized steel, stainless steel, corten steel and brass.

Available CPD Material (2)

Precious Metals in Steel Windows and Doors

This CPD aims to discuss the application of integrated systems for doors, windows and shutters, and façades in galvanized steel, stainless steel, Cor-ten or weathering steel and brass, to guarantee maximum levels of sustainability, comfort and wellbeing. By the end of the seminar you should have a greater understanding of:

- Different precious metals and their associated technical features
- The nature of steel
- Shaping steel
- Design variations
- Building integrated steel doors and windows

Material type: Seminar
RIBA Core Curriculum: [Design, construction and technology](#)
Knowledge level: General Awareness

The Evolution of Steel Windows

This CPD Seminar looks at the evolution of steel window systems from non thermally broken through to triple glazed high performing thermally broken systems and examines the advantages, disadvantages and environmental impact of different profiles and materials. It also demonstrates the Lifecycle and maintenance needed for the different finishes available.

Material type: Seminar
RIBA Core Curriculum: [Design, construction and technology](#)
Knowledge level: General Awareness
