### Secure Solutions for Entrance Access Control

This CPD concentrates on the different types of Pedestrian Speed Gates available in the market place, and looks at Low, Medium and High Security models for both internal and external installations. It is intended to show general awareness of these products and how they have become an integral part of every day security solutions. By the end of the presentation you should have a greater understanding of:

- Pedestrian Gates and the situations they can be used in
- Security Risk Assessment for low, medium and high security situations
- The methods of installation for both external and internal floor types
- The different types of products available - including finishes and customisation
- Where to obtain Product and Technical information (Bim Object), data sheets and Certification

This CPD can be delivered to you live and remotely

Material type: Online Learning, Seminar, Video  
RIBA Core Curriculum: **Design, construction and technology**  
Knowledge level: General Awareness
