CPD Overview

Galvanizers Association (GA) has provided authoritative information and advice on hot dip galvanizing to users and potential users since it was first established in 1949. It is the representational body for the hot dip galvanizing industry in the UK and the Republic of Ireland.

For many years, the company's advice and information has been used to educate and inform professionals within the construction industry. Hot dip galvanizing makes a vital contribution to the sustainable growth of the economy, protecting the huge investment provided by industry across a wide range of sectors year-on-year.

GA were founder members of the RIBA CPD Providers Network and work closely with RIBA to continue to provide relevant information for specifiers across all sectors of the construction industry.

Available CPD Material (4)

Galvanizing and Sustainable Construction

What is sustainability?

- Sustainable aspects of galvanizing: carbon footprint, recycling and durability
- The benefits of zinc and steel
- Case studies: Life Cycle Analysis

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

The Engineers' and Architects' Guide: Hot Dip Galvanizing

The literature is designed to help develop the most effective, practical and economic solutions to corrosion prevention.

Material type: Literature

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

The Engineers' and Architects' Guide to Hot Dip Galvanized Nuts and Bolts

The literature is the engineers' and architects' guide to hot dip galvanized nuts and bolts.

Material type: Literature

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Corrosion Protection of Steel by Hot Dip Galvanizing

Introduction to hot dip galvanizing

- The galvanizing process
- Coating characteristics and performance
- Designing for the process
- Sustainability
- Project library

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Sustainable architecture

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

RIBA Core Curriculum areas

Design, construction and technology

Knowledge level: *General Awareness*
