CPD Overview

Interfloor, part of the Victoria plc group of companies, was created by the merger of Tredaire and Duralay in 2002 but their heritage dates back to the 1940s when Duralay began manufacturing the first carpet underlays in the UK.

They are one of Europe's largest manufacturer of carpet underlay and flooring accessories and they supply their products to flooring retailers, distributors and flooring contractors in the UK and around the world.

They manufacture a diverse range of products including the three most popular forms of underlay – polyurethane foam, sponge rubber and crumb rubber. They also produce carpet gripper, floor edgings, flooring adhesives, tapes and tools.

Their goal is to be the supplier of first choice to their customers by providing better products, better brands and better service to enable them to be successful.

Available CPD Material (2)

A Specifiers Guide to Subfloor Acoustic Mats

The presentation covers why acoustics are important in the built environment. It explores the relevant types of acoustic problems and how subfloor acoustic mats can help to manage these. It also covers manufacturing, how the system works and is installed, and the acoustic improvements you can expect from this type of construction. As well as this, it looks at how to specify the right product, the benefits of correct specification and environmental considerations. By the end of the CPD you should have a greater understanding of:

- Types of acoustic problems possible
- Suitability of products for given projects
- How the system is integrated in the floor build up
- Acoustic benefits
- How to specify the correct product

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

A Specifiers Guide to Underlay and More

This seminar looks at the benefits of choosing the right underlay for your project. It will help you to understand the following topics:

- Why good underlay is important
- What underlay is, the most common types and how they are manufactured
- How underlay should be installed
- Contract and commercial applications, choosing the right underlay, standards, fire rating and cost considerations
- Acoustic considerations and benefits
- Environmental and ethical considerations

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
