CPD Overview

Arjo believe that empowering movement within healthcare environments is essential to quality care. As leading experts in this field, their mission is to support people with the right environment, skills and equipment for empowering movement. For over 60 years Arjo have been working in close collaboration with healthcare professionals, giving them a unique understanding for everyday challenges.

Our products and solutions ensure ergonomic patient handling, hygiene, disinfection, diagnostics, and the effective prevention of pressure injuries and venous thromboembolism – and help professionals across care environments to provide good, safe and dignified care. Our installed product portfolio includes assisted baths, ceiling track hoists as well as sluice room furniture, bedpan washers and pool hoists .

Arjo have a long history of collaborating closely with architects, nursing home executives, safe patient handling experts, residents and relatives. Planning a care facility is about planning for the future, and will impact the efficiency and quality of care.

Arjo's experience has taught them that to create efficient care facilities and to obtain a good working environment, the right combination of environment, equipment and care skills are needed. Arjo have talked to architects across the globe to find out more about their processes and how we can support them. The result is an online portal for architects, the Arjo Guide for Architects and Planners.

Available CPD Material (5)

Changing Places

This CPD will discuss Changing Places toilets for disabled people and the associated specification, design, planning and installation requirements. Topics covered include the current situation for toilets for the disabled, what and who are Changing Places, understanding the Purple Pound, and requirements, guidelines, planning and design. By the end of the seminar you should have a greater understanding of:

- The benefits for disabled people when using a Changing Places toilet
- The benefits to businesses of Changing Places toilets
- Requirements and installation options

Material type: Online Learning, Seminar
RIBA Core Curriculum: **Inclusive environments**
Legal, regulatory and statutory compliance
Knowledge level: Microlearning

Promoting effective disinfection within healthcare facilities

This CPD is designed to educate and inform attendees about the risks associated with poor infection control routines and the benefits of how a well organised and efficiently run sluice room can reduce the spread of infections and safeguard vulnerable residents from infections.

Material type: Seminar
RIBA Core Curriculum: **Health, safety and wellbeing**
Inclusive environments
Knowledge level: General Awareness

Designing and Specifying Overhead Ceiling Track Systems

This CPD is designed to demonstrate the flexibility, versatility and benefits of ceiling track systems. It provides options that are available, including layout design and various methods of installation. Evidence has shown that using ceiling track systems can be quicker and easier to use than floor lifters and, in some cases, residents / patients prefer them.

Material type: Online Learning
RIBA Core Curriculum: **Design, construction and technology**
Inclusive environments
Knowledge level: General Awareness

Multiple formats

Designing Accessible Hygiene Facilities

To introduce architects to the benefits of understanding patient / resident mobility along with implementing a basic 8 step principle to ensure that the environment, equipment and care skills are vital components when considering showering or bathing patients or residents. Providing examples of typical issues and concerns from the caregiver, resident and facility while also considering the correct type of equipment to select for the resident's dignity, engagement and wellbeing.

By the end of the CPD you should have a greater understanding of:

- Mobility assessment tools
- The amount of space required when designing bedrooms and hygiene rooms
- The importance of space equipment and care skills

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Health, safety and wellbeing**
Inclusive environments

Knowledge level: General Awareness

Multiple formats

Designing Efficient Healthcare Facilities

This CPD aims to provide expert advice on designing healthcare facilities and consideration of patient/resident's quality of care along with the quality of work from caregivers. It takes into account the environment, the equipment and the care skills required to implement efficiencies resulting in a positive financial outcome for the facility.

Material type: Online Learning, Seminar

RIBA Core Curriculum: **Design, construction and technology**
Inclusive environments

Knowledge level: General Awareness

Classifications

Subject/Product Areas (CI/SfB)

Fittings

Sanitary and bathroom fittings > Bathroom accessories

Special fittings > Hospital, medical, dental fittings

External works

Landscaping, hard surfaces, pools > Swimming pools, fittings, enclosures

Special activities, requirements

Environment for the disabled and elderly > Hoists for accessibility

Environment for the disabled and elderly > Baths for accessibility

Engineering

Furniture/equipment > Sanitary appliances and fittings

Transport > Lift, transport systems
