CPD Overview

Szerelmey is a stone masonry and restoration specialist contractor. We have developed management, design, commercial and skilled labour resources to offer a range of services for restoration and new build. Szerelmey has gained a reputation for excellence amongst consultants and contractors across the whole of the construction industry.

Available CPD Material (5)

The Use of Natural Stone in Interiors

The purpose of this seminar is to increase the knowledge and understanding of the use of natural stone for internal applications. This includes stone selection, design, installation, standards and guidance. It will help you to understand the following topics:

- Understand stone as a building material for internal use
- Understand design possibilities and limitations
- Understand fixing and installing stone for internal use
- Understand sustainable aspects of the material
- Understand best practice for good design

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

The Design of Natural Stone, Non-Load Bearing Cladding and the Failure of Cladding

This seminar looks at the design of stonework, concentrating on the main requirements for good practice. It aims to increase the knowledge and understanding of the selection of stone and how it can be used in construction. This includes the different types of stone, extraction, selection process, design, fixing, finishes, British standards and sustainability. It will help you to understand the following topics:

- Understand the history of stone
- Understand stone selection, monitoring and quality assurance
- Understand fixing techniques and the requirement for skilled installation
- Understand design issues and scheduling
- Understand CNC technology and finishes
- Understand guidelines and standards
- Understand what not to do

Material type: Seminar

RIBA Core Curriculum: **Building conservation and heritage**
Design, construction and technology
Legal, regulatory and statutory compliance

Knowledge level: General Awareness

Typical Cleaning Techniques and Restoration of Terracotta, Faience and Brickwork

This seminar provides an overview of the cleaning and restoration of terracotta, faience and brick buildings. It will help you to understand the following topics:

- Understand why you would want to clean the facade of a brick terracotta or faience building
- Understand the different methods of cleaning the building fabric
- Understand what not to do when cleaning a building
- Understand the repair and conservation of brick, terracotta and faience facades and the different techniques used

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Typical Cleaning Techniques, Restoration and Conservation of Natural Stone

This seminar provides an overview of the cleaning and restoration of stone facades of buildings and incorporates case studies of stone restoration projects. It will help you to understand the following topics:

- Understand why you would want to clean the facade of a stone building
- Understand the different methods available for cleaning the building fabric
- Understand what not to do when cleaning a building
- Understand the repair and conservation of stone facades and the different techniques used

Material type: Seminar

RIBA Core Curriculum: **Building conservation and heritage**
Design, construction and technology

Knowledge level: General Awareness

The Use of Terracotta and Faience in Modern Buildings

This seminar provides an overview of terracotta and faience and will give you a sound, basic knowledge of how this material can be used in the construction industry. It will help you to understand the following topics:

- Understand the design implications of using terracotta and faience as a building material
- Understand the different forming methods and glazing techniques
- Understand how kilns work
- Understand general fixing and installation details
- Understand the different extrusion and hand production processes
- Understand the use of terracotta on precast products
- Understand the sustainable benefit of terracotta and faience

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness
