Specifying Windows and Doors: Safety, Security, Means of Escape and Best Value

Specifiers and building owners have a duty of care to their residents to ensure that they are safe, secure and that the property meets their needs. This seminar teaches delegates how to protect residents through specifying the appropriate level of security, how to meet emergency escape requirements and minimise the risk of accidents and falls involving windows. It will help you to understand the following topics:

- How to meet the current legislative requirements, and comply with British standards and best practice guidelines when specifying windows and doors
- What is commonly accepted as enhanced security for windows and doors in a residential environment
- What needs to be considered when specifying fire escape via windows and doors
- How to specify products that are fit for purpose, that deliver best value and meet your duty of care to residents
