Single Ply Online Training and Assessment Course

This online course is aimed at any built environment professional who is involved with the specification, inspection, installation and maintenance of a single ply roofing system. It aims to improve knowledge and understanding of single ply roofing, to improve quality of future design and the specification, installation, aftercare and sustainability of single ply roofing systems. The course is divided into the following 9 sections, each taking 30 mins to 1 hour to complete:

- Types of single ply membrane roof systems, customer care and safe working
- Types of single ply roof and fixings
- Roof zone, loading and wind loading
- Design for drainage, thermal insulation and fire prevention
- Material options
- Installation and protection
- Attachment and seams
- Good detailing
- Project completion

There is a multiple-choice test at the end of each section and 80% correct answers are required to gain a certificate. The course can be completed in your own time and the tests can be taken more than once. To take the course go to the website at <https://www.spratraining.co.uk> and register to start.
