CPD Overview

tremco illbruck is a leading European manufacturer and service provider of high-performance sealing, bonding, flooring, waterproofing and passive fire protection solutions for the construction industry.

Five Centres of Excellence across Europe deliver the right services – linked to a range of specialized product brands: illbruck, TREMCO and Nullifire

Available CPD Material (5)

A Guide to the Requirements of Fire Stopping

The seminar provides a guide to achieving compliant fire stopping and discusses fire, how it happens, its different types and fire protection. It explains the different types of passive fire protection systems and the regulations and legislation around fire protection. It will help you to understand the following topics:

- Understand fire, how it happens, its types and how to protect against it
- Understand types of fire protection, active and passive
- Understand the importance of integration of passive fire protection during early construction phases
- Understand the types of products used in passive fire protection
- Understand typical examples of improper installation on site

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Health, safety and wellbeing

Knowledge level: General Awareness

A Guide to Detailing of Interfaces on Windows and Facades

To gain awareness of relevant legislation affecting the consideration of interface solutions.

- To gain understanding of the functional criteria involved.
- How to undertake robust sealing - product solutions and examples of bad practice.
- Alternative product solutions.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**
Legal, regulatory and statutory compliance

Knowledge level: General Awareness

A Guide to the Specification of Cold Applied Liquid Waterproofing

The seminar provides clarity around the selection and use of Liquid Applied Waterproofing Systems (LAWS). There is a large - and increasing - choice of systems available to the specifier. This presentation explains the difference between them, and how one goes about selecting a system that is appropriate to a particular application.

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

A Guide to the Waterproofing of Below Ground Structures

This seminar will provide an overall appreciation of BS8102 Waterproofing of Underground Structures and a particular insight into factors affecting selection and detailing of Type A Tanked Structures

Material type: Seminar

RIBA Core Curriculum: **Design, construction and technology**

Knowledge level: General Awareness

Surface Membranes and Their Application

This seminar provides a review of the causes of failure in floor coverings, the role of moisture content in concrete and test, methods. The preparation and application of surface damp proof membranes.
